

**Project Design Phase-II**  
**Technology Stack (Architecture & Stack)**

|               |  |
|---------------|--|
| Date          | 22 October 2022                                      |
| Team ID       | PNT2022TMID18894                                     |
| Project Name  | INDUSTRY-SPECIFIC INTELLIGENT FIRE MANAGEMENT SYSTEM |
| Maximum Marks | 4 Marks  |

**Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

**Table-1: Components & Technologies:**

| S. No | Component                       | Description  | Technology                                      |
|-------|---------------------------------|--|---|
| 1.    | User Interface                  | Web UI, Node-RED, MIT app  | IBM IoT Platform, IBM Node red, IBM Cloud       |
| 2.    | Application Logic-1             | Create Ibm Watson IoT platform and create node-red service   | IBM Watson, IBM cloud ant service, IBM node-red |
| 3.    | Application Logic-2             | Develop python script to publish and subscribe to IBM IoT Platform   | python  |
| 4.    | Application Logic-3             | Build a web application using node-red service   | IBM Node-red                                    |
| 5.    | Database                        | Data Type, Configurations etc.   | MySQL   |
| 6.    | Cloud Database                  | Database Service on Cloud  | IBM DB2, IBM Cloudant                           |
| 7.    | File Storage                    | Developing mobile application to store and receive the sensors information and to react accordingly                          | Web UI, python                                  |
| 8.    | External API-1                  | Using this IBM fire management API, we can track the temperature of the incident place and where the fire had been attacked. | IBM fire management API                         |
| 9.    | External API-2                  | Using this IBM Sensors it detects the fire, gas leaks, temperature and provides the activation of sprinklers to web UI       | IBM Sensors                                     |
| 10.   | Machine Learning Model          | Using this we can derive the object recognition model  | Object Recognition Model                        |
| 11.   | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud<br>Cloud Server Configuration   | IBM cloud ant, IBM IoT Platform                 |

**Table-2: Application Characteristics:**

| <b>S.No</b> | <b>Characteristics</b>   | <b>Description</b>                      | <b>Technology</b>         |
|-------------|--------------------------|---|---------------------------|
| 1.          | Open-Source Frameworks   | MIT app Inventor                        | MIT License               |
| 2.          | Security Implementations | IBM Services                            | Encryptions, IBM Controls |
| 3.          | Scalable Architecture    | sensor-IoT Cloud based architecture     | cloud computing and AI    |
| 4.          | Availability             | Mobile, laptop, desktop                 | MIT app                   |
| 5.          | Performance              | Detects the Fire, gas leak, temperature | sensors                   |
